Utilities

a. mFormat.exe

Available Options:

- ~ Quick / Full Format
- ~ Enable Password Secure Protection feature
- ~ Make Disk Bootable

- “mFormat.exe” is used for formatting the **Cool Disk V2** in “QUICK” or “FULL” style. Also, it allows you to enable or disable the SECURE Protection and BOOTABLE features.
- To format the **Cool Disk V2**, choose “QUICK” or “FULL” and click “Start”. It is recommended to use “QUICK” format for **Cool Disk V2**. It is good for longer product life time.
- To partition the **Cool Disk V2** into 2, slide the bar to adjust the size of disk 1 and disk 2. For Windows 2000, you need to install service pack 3 to recognize both disks.

** **Cool Disk V2** has been already formatted for first time use.

- If “Password Feature” is enabled, you are able to modify the password in “Passid.exe”.
- If “Make Bootable Disk” is selected, **Cool Disk V2** will copy some system files for USB booting after formatting. This USB booting function is required mainboard BIOS support. Not all mainboard BIOS has this support. Please check your mainboard supplier for details.

b. Passid.exe

- To access the password feature for **Cool Disk V2**, run “Passid.exe” and provide the correct password. You are also able to modify the password here. This utility has been already bundled in the **Cool Disk V2** for your daily operation.
- When password feature is enabled, after plug off **Cool Disk V2** from the computer, it would be self locked. When plug-in again, it is requested to enter the password to access.
- To disable the password feature, run “mFormat.exe” and disable this feature. Please note that when you click “Start”, the **Cool Disk V2** is formatted and all data will be lost.
